EDUCATION

B.Tech Physics Electronics

Graduated:11/2023

Federal University of
Technology, Akure.

PROJECTS

IP Adress Tracker

Developed a responsive IP address tracking web application, ensuring seamless accessibility across various devices and screen sizes.

Integrated interactive maps to visually pinpoint IP addresses, enhancing user experience by providing real-time location data.

Implemented dynamic feature listings, displaying critical information such as ISP, location, and timezone based on user input.

Space Website

Engineered a responsive and pixel-perfect space website, following a detailed UI design in less than three days.

Made sure to include animations using framer-motion to make the website feel “alive” to improve user experience.

Identified and addressed a blank screen issue to improve functionality and user experience, resulting in a 50% reduction in user-reported issues, by using **Axios** as the main HTTP Client.

Memory Game

Created an interactive webapp game that made use of the concepts of states to flip cards and find their match

Achieved a more efficient workflow by automating repetitive tasks through **SCSS** mixins. As a result, the project's development time was reduced by 20%.

CERTIFICATION & SKILLS

- Modern JavaScript From The Beginning
- Modern HTML & CSS From The Beginning (Including Sass)
- Programming Languages: HTML5, CSS3 , JavaScript
- Frameworks and libraries: ReactJS, TailwindCSS, Next.JS, Three.JS Framer-motion
- CSS Preprocessors: SCSS
- Tools: Git, GitHub, Firebase, Sanity.io
